Your School's Name Here

1 hour lessons

Time and dates TBD

\$155/8-week session

Cost includes all materials

Learn to play music in a fun and nurturing environment.

Students receive personalized keyboard instruction, work on songs of their choice, and develop musical skills in a "go-at-your-own-pace" pressure-free setting.

All ages welcomed. We pick up kindergartners for our program and walk children to aftercare when it's over. Let us know if you need this service.

Letter to Parents**

Dear Parents,

Cody's Keyboard Club teaches children of all ages, levels of experience, talent, and interest how to play electric keyboards. We bring a keyboard and headsets for each student to use in class, and they work on music of their choice. We have a new feature this year - personalized homework plans and email follow-up. We email practice guides home so that "how to practice" is not left up to your children's memory.

How we teach

We do everything we can to keep our students engaged, including constantly expanding our music library. The majority of our songs are student requests from the radio and Disney movies. Our most recent additions are Believer by Imagine Dragons, the music from Lego Ninjago, Moana, and Can't Stop the Feeling from the movie Trolls and many more. As soon as new songs become popular, we immediately prepare easy versions tailored for our students. We also have advanced versions for our more experienced students. It is always a fun surprise to find out what music the students want to learn.

Non-Music Benefits

An important part of our curriculum is the opportunity to practice presenting in front of an audience with confidence. In Cody's Keyboard Club, our students exercise projecting their voices and how to make a good impression in front of a group. We focus on strengthening children's self-esteem and confidence. We implement spatial-temporal reasoning—reasoning in space and time—in our teaching method.

To find out more about our program or to enroll, please contact me at
